Stakeholders' Targeted Consultation EU4Health Annual Work Programme 2024

The EU4Health Programme is the response to the COVID-19 pandemic and aims to build a strong European Health Union by supporting legislative and non-legislative Union health priorities. The EU4Health Programme was adopted in March 2021 with a budget of EUR 5.3 billion over the period 2021-27. This represents an unprecedented level of financial commitment for the Union in health.

This targeted consultation is intended to seek the opinion of stakeholders about current and future Union health priorities and strategic orientations and on key health needs to be addressed through the EU4Health annual work programmes, providing inputs for reflection on the 2024 EU4Health work programme and beyond. Its results will be used for drafting a consultations report (see the report on the 2023 work programme's consultations – [link](#)). They will also feed into the EU4Health stakeholders' conference on 9 June 2023.

For further information please read the consultation strategy. ([link](#))

This targeted consultation will be available from 30 March to 22 May 2023.

Please read carefully the privacy statement before proceeding. The questionnaire consists of seven, mainly multiple choice, questions.

EU4Health work programme 2024 – strategic orientations and priorities

The EU4Health Programme (Regulation (EU) 2021/522) was adopted in March 2021. So far, three annual work programmes have been adopted for 2021, 2022 and 2023. These three work programmes cover relevant areas of interventions for achieving the general and specific objectives of the EU4Health Regulation.

1. For simplification, in the annual work programme the actions funded under the EU4Health have been clustered in “strand of actions”. In your opinion in the work programme which strand of actions is most important for addressing the current needs in health? Please see the consultation strategy ([link](#)) for the description of the strands.

Please score from one to five the importance of strands for funding: **1 = Very important 2 = Important 3 = Not very important 4 = Not important 5 = No opinion**

	1	2	3	4	5
* Strand of action 01: Crisis preparedness	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
* Strand of action 02: Disease prevention & health promotion	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

* Strand of action (transversal) 05: Cancer	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Please indicate the strand of action that in your opinion **has not been suitably covered** under WP 2021, WP 2022 or WP 2023.

* Strand of action (transversal) 05: Cancer	<input type="radio"/>	<input checked="" type="radio"/>

Please specify, if needed, why the area of intervention needs reinforcement in your opinion (maximum 10 key words).

NCD prevention improvement could reduce burden by up to 70%.

Reducing alcohol use through controls on price, marketing and availability is critical to disease prevention and is highly cost effective. We also strongly support the submission from the European Alcohol Policy Alliance (Eurocare) across all of this consultation.

It is critical to focus on population level mechanisms to reduce alcohol use, smoking and consumption of unhealthy foods. All of these industries share common approaches to the marketing, pricing and availability of these unhealthy products and similar legislative approaches are needed in reducing their use.

Equally there is a need to ensure that public health objectives are given primacy over vested interests in terms of setting and implementing effective policy controls.

There should be systematic monitoring of the activities of these unhealthy industries in terms of their access to policy makers and their political lobbying and campaign funding across multiple sectors. It is imperative that there is a deep understanding in health divisions of the activities of these industries in influencing policies across agriculture and food production.
